

comfort and class your patients will notice

Unprecedented comfort

The optimally designed stable back support maximises patient comfort. The contoured upholstery conforms to the patient's anatomy, ensuring relaxation even during long treatments.

Exceptional upholstery

The smooth, seamless and easy-to-maintain Standard upholstery completes the chair appearance. The armrests, supplied as option, also have the same stylish upholstery. You can choose the child cushion set in the same or a distinct matching colour.

Child cushion set

The multifunctional child cushion set helps you to position small patients comfortably. The cushion set can also be used to give extra support under a tall person's legs.

Luxurious Ultra upholstery

Alternatively, the chair can be equipped with the viscoelastic Ultra upholstery, which adapts perfectly to follow the patient's anatomy. The Ultra upholstery is filled with special viscoelastic foam that follows the patient's body shape and restores its original shape after the treatment. The Ultra upholstery provides extra comfort, appreciated especially in long treatment sessions.

Metallic colours

The Ultra upholstery is now also available in metallic and new metallic colours. With this novel fabric, the upholstery gets a modern, shiny and extravagant look the patients will notice at once.
